PROJECTS

Musicly — *Simple music player website*

Musicly is a simple music player website that has been built using HTML, CSS, Bootstrap, and JavaScript. The website has a selection of pre-loaded songs that can be played, paused, and resumed.

Attendance-using-face-recognition

I had developed a project that utilizes facial recognition to take attendance. The project was built using Python and OpenCV. The program is able to identify students' faces and record their attendance. This project has the potential to be used in schools and other educational institutions to improve attendance tracking.

SKILLS

Python

Front end for Websites
